Office: 2044E

Title of Change: Install Front Page 98 web server extension on pete.hitc.com

Additional Info:

What are FrontPage Server Extensions?

FrontPage server extensions are a set of server-side applications that:

- Let multiple users simultaneously collaborate on the same Web site and Web Server (Multi-user Authoring).

- Let users include forms on their Web site and specify how the results of those forms are handled.

- Let users include discussion Webs on their Web site

- Provide full text search capability on a Web site.

- Let users include hit counters on their Web site

This "pre-packaged" functionality lets users incorporate these advanced features without having to write the complex server-side programs typically required. FrontPage is the only Web creation and management tool that offers all of these features.

The FrontPage server extensions are available FREE for download.

Can users create a FrontPage-based Web without using the Server Extensions?

Absolutely, with the exception of the functionality mentioned above, there is no difference between a Web site that uses the server extensions and one that does not. FrontPage is a great solution for creating and managing a Web site with or without the server extensions.

What Web servers do the FrontPage Server Extensions support?

FrontPage Server Extensions support all popular UNIX and Microsoft Windows NT®-based Web servers including Microsoft Internet Information Server, Apache, CERN, NCSA, Netscape, Linux, SunOS, and Solaris. For a complete listing please see the supported platforms and servers page.
